

APG's Series 6000C -- A POS Cash Drawer that Works as Good as It Looks

Features That Cover Your POS Needs -- Front and Back

APG

's Series 6000C family of rugged, attractive cash drawers provide a unique workstation foundation for POS applications such as automotive, specialty retail and convenience stores that demand a sharp, low-profile look and rugged, full-featured performance.

Up front, all Series 6000C drawers offer dual media slots with spacious media storage and innovative under-till coin roll storage (photo inset above). These features improve your cash management capabilities. A tough steel-backed plastic drawer front presents a softer, eye-pleasing alternative to metal.

Choose from three Series 6000C cash drawer models for the "back-of-drawer" features that best meet your cable management and counter footprint needs.

Meet the Family!

The three models of the Series 6000C family give you a range of features and sizes to satisfy your POS form, fit and function requirements.

The POS-Partner Drawer -- A spacious rear cable compartment makes it easy to route, manage and access cables. A handy shelf supports power supplies or other equipment and keeps them safely out of sight. This drawer is the foundation of the POS-Partner System.

The Utility Drawer -- A great choice for cabling management and routing when a smaller footprint is desired. Cable connectors pass easily through the handy cable openings on the top and bottom of the drawer.

The Basic Drawer -- All the cash management features of the Partner or Utility drawers, but in a smaller footprint. An excellent solution when counter depth is restricted and cable routing is not required.

Clean up the clutter and improve the performance of your POS workstation with APG's good-looking, hard-working Series 6000C family of cash drawers.

APG CASH DRAWER®

Build on a Solid Foundation®
