MMF POS-Platform™ System... **Your BEST Solution to POS Open Architecture!**

Now you can organize your point-of-sale peripherals into one integrated universal POS package, by using MMF's POS-Platform™ System.

MMF's POS-Platform™ System combines a precision-built cash drawer, which is available in all MMF interface options, with the Platform that rests on top of the drawer.

MMF's POS-Platform™ System also provides universal capability for most solenoid-driven receipt printers. A 6 pin DIN connector is mounted in the rear cable storage compartment, allowing for quick, efficient receipt printer connection.

This rear storage compartment, which provides space to neatly conceal cables and a surge protector, is easily accessible via a removable panel.

Easy to assemble, MMF's POS-Platform™ System gives you an organized, contemporary unit in a matter of minutes.

POS-Platform™ - 225-6000-89

DIMENSIONS: Drawer - 18.81"W x 21"D x 3.88" H
